

VYOND

Vyond For Enterprise

Vyond for Enterprise is designed to ensure that Vyond fits into - and scales across - large enterprise organizations. Vyond's robust security, easy branding options, and snappy, responsive interface make it powerful enough to scale throughout even the largest organization. From sharing and organization to branding to security - Vyond for Enterprise is what your organization needs to engage your audience and get your message across.

Shared Spaces

Shared Spaces is a Vyond for Enterprise feature in Vyond, **allowing users to easily create and share folders administered from the account level for specific purposes, projects and groups.**

- **Enable Company-Wide Project Management** - videos, folders within spaces, and hierarchies will appear the same throughout your organization - enabling much easier project management.
- **Securely Manage Teams and Third Parties** - allow teams, third parties and contractors to access only the materials they need while keeping your proprietary information confidential.
- **Reduce time in onboarding and offboarding** by managing access rights. Your videos are stored at the organizational level and not at the individual user level so users don't need to waste time transferring videos to a team member.
- **Manage projects more efficiently** by creating spaces for specific projects or purposes.
- **Save valuable time** by sharing multiple folders within a single space.
- **Quickly share folders and videos** with your entire organization with Default Spaces.

Vyond Secure Suite

Vyond for Enterprise includes Vyond Secure Suite, a collection of enterprise security features designed to comply with the IT security standards of any company.

- **Single Sign-On** - integrate Vyond directly with authentication services like Google Workspace, Office 365, and SAML 2.0 (both SP and IdP initiated).
- **Brute-Force Login Protection** - administrator-defined number of login attempts before an account is locked.
- **Inactivity Logout** - log users out after an administrator-defined time period of inactivity.
- **IP Whitelisting** - ensure that your organization's Vyond account is only accessible through trusted connections. This prevents logins from any IP address that has not been specifically whitelisted.
- **Password Complexity** - administrator-defined password requirements.
- **Custom Video Cache Expiration** - define how long data will remain cached on our AWS servers.
- **Optional Security Features**
Data partitioning: secure your video data in its own separate database preventing it from being commingled with that of other companies.

Encryption keys: further secure your video data by providing and controlling the subscription keys used to safeguard data stored at rest.

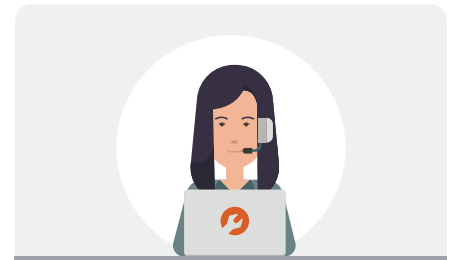

Branding Concierge Service*

Vyond for Enterprise includes access to our branding concierge service. Our customer success team will work with your brand management team to create easy-to-access branding materials for your team. This will include fonts, colors, characters, and more. All branding materials will be placed into a default space that will be accessible to all members of your organization. This is helpful for organizations with strict brand guidelines that need to be adhered to in all content that is created.

Vyond Accel*

The Vyond Accel program helps large organizations define, deliver, and standardize video-making skills and best practices to get the most out of Vyond. You and your team will develop expert-level capabilities faster, and deliver outstanding videos sooner.

Onboard

Once we've identified needs and goals, we can get your team up to speed on the Vyond platform. Our team gives you the tools to get new users access, guides, and a full understanding of Vyond Studio's capabilities.

We help you:

- Understand the admin panel
- Provide "Getting Started" guides to onboard future users
- Process user account activation

Train & Support

Once your team is on board, Vyond Accel provides four tailored sessions — with any combination of introductory, intermediate, or advanced training — and post-training best-practice sessions, all recorded for future use. We also provide quarterly account reviews to discuss incoming support queries, feedback, and upcoming features for enterprise customers.

We help you:

- Connect with a named customer success manager
- Access recorded training sessions
- Deliver future trainings for new user

Consult & Assess

Learning new software is hard, but not with Vyond Studio, and we've made it easy to get started. Vyond Accel assesses your needs and goals, so you build the skills most relevant to your objectives first.

We help you:

- Discover goals, styles, standards, best practices, and brand guidelines
- Review your team's video creation skills
- Categorize types of videos to create and target audiences of any size

**Available with 10 seats or more*
